SUMMARY

React/TypeScript software engineer with 3 years of experience building enterprise web applications at Publicis Media and full-stack ownership on independent projects. Led frontend architecture across multiple internal tools, collaborated with Java and Django/Python backend systems, and independently built full-stack applications with Node, PostgreSQL, and TypeScript.

EXPERIENCE

React Developer / Software Engineer | Publicis Media

September 2022 - November 2025

- Led frontend development across multiple enterprise applications for internal teams and external clients, growing from sole frontend developer into a technical leadership role.
- Mentored junior and mid-level developers through hiring, onboarding, code review, and day-to-day technical guidance.
- Established shared React component patterns and frontend architecture used across multiple applications, reducing duplication and improving delivery consistency.
- Built data-heavy React/TypeScript applications for analytics and campaign management workflows, including dashboards handling 10-50K records per session.
- Migrated legacy Angular and Java/Spring Boot application interfaces to React, modernizing reporting, filtering, and user management workflows.
- Collaborated with Java/Spring Boot and Django/Python backend systems by designing API contracts, integrating data pipelines, and diagnosing cross-service issues.

Lawn Care Technician | TruGreen

2013 - 2021

- Advanced from residential to commercial accounts over 8 years before transitioning into software engineering through self-directed study.

PROJECTS

Santa's Lil' Helper

github.com/nico-nunez/slh-v2

- Built and deployed a full-stack gift exchange platform using React Router v7, TypeScript, Node, PostgreSQL, and Drizzle ORM.
- Owned the application end to end, including data modeling, backend services, validation, deployment, and automated testing.

Visceral

github.com/nico-nunez/meh-groovebox-visceral

- Building a standalone macOS groovebox in C++ with CoreAudio/CoreMIDI, Lua scripting, MIDI input, preset management, and a reusable synth engine.
- Designed a code-driven performance workflow with shared transport, pattern-based sequencing, live parameter control, and authored Lua documents.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL, C++
- **Frontend:** React, React Router v7, HTML, CSS, Tailwind, TanStack Query, Redux, Zustand
- **Backend:** Node.js, Django, REST API design, PostgreSQL, Drizzle ORM
- **Testing:** Playwright, Vitest, React Testing Library
- **Tools & Infrastructure:** Git, Docker, AWS, GCP, Vite, Jenkins

EDUCATION
